The way forward to achieving  
business excellence

Machine Inspector Programme

Dicksons work closely with Irish industrial businesses to minimise Total Cost of Operations. Focusing on Foundation Maintenance Services and implementing industrial best practices, fully supported by SKF, can lead to reduced maintenance costs and improve production efficiency. By integrating closely with your production, operations, engineering and maintenance teams Dicksons are able to provide the highest quality total asset management services.

**Plant reliability activities can include:**

- Visual Surveys
- Vibration Surveys
- Field Oil Testing
- Field Grease Testing
- Oil Sampling

**Lubrication management service which can include:**

- Oil Analysis
- Lubrication Assets Surveys
- Intelligent Lubrication Solutions
- Synthetic Food Grade Lubricants
- Compressor Oils
- Bearing Greases
- Gear Oils

Dickson Bearing and Transmissions Ltd, became the first Irish SKF Certified Maintenance Partner (CMP) back in August 2005. The program has developed over the past years offering world class maintenance services backed by SKF, a world leader in reliability solutions and knowledge engineering. Through the CMP programme, SKF provides Dicksons with the latest, best in class processes and most innovative technology available in the maintenance industry.

SKF and Dicksons work together to build a unique and intimate understanding of the processes and challenges specific to each customer. Through the CMP programme, all customers can benefit from the extensive resources and experience from both companies to optimise machine asset to increase productivity, reliability and profitability.
